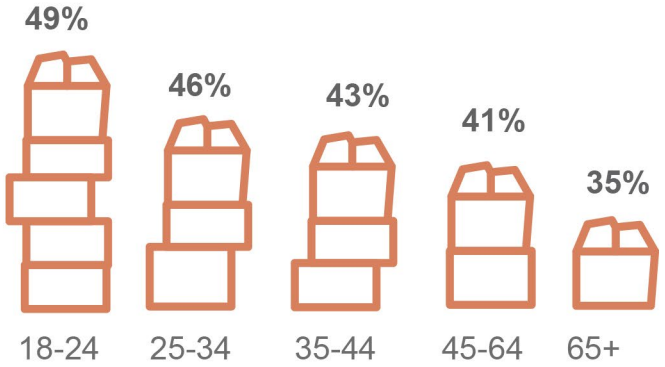
Transportation
CO_2
public transportation
TAXI
private car
gas

Primary research

Percentage of purchases that are impulse buys



18-24 year olds are the group most likely to discard an item after **1-5 wears**

If everyone bought one item new instead of used this year, it would waste:

5.7B lbs of CO_2e
=66M trees planted

25B gallons of water
=1.25B showers

449M lbs of waste
=18,700 garbage trucks full

Fashion is one of the most pollutive industries in the world.

75 lbs — of CO_2e to produce the average pair of jeans.

700 gallons — of water to make one new T-shirt

50% — people throwing their unwanted clothes straight in the trash

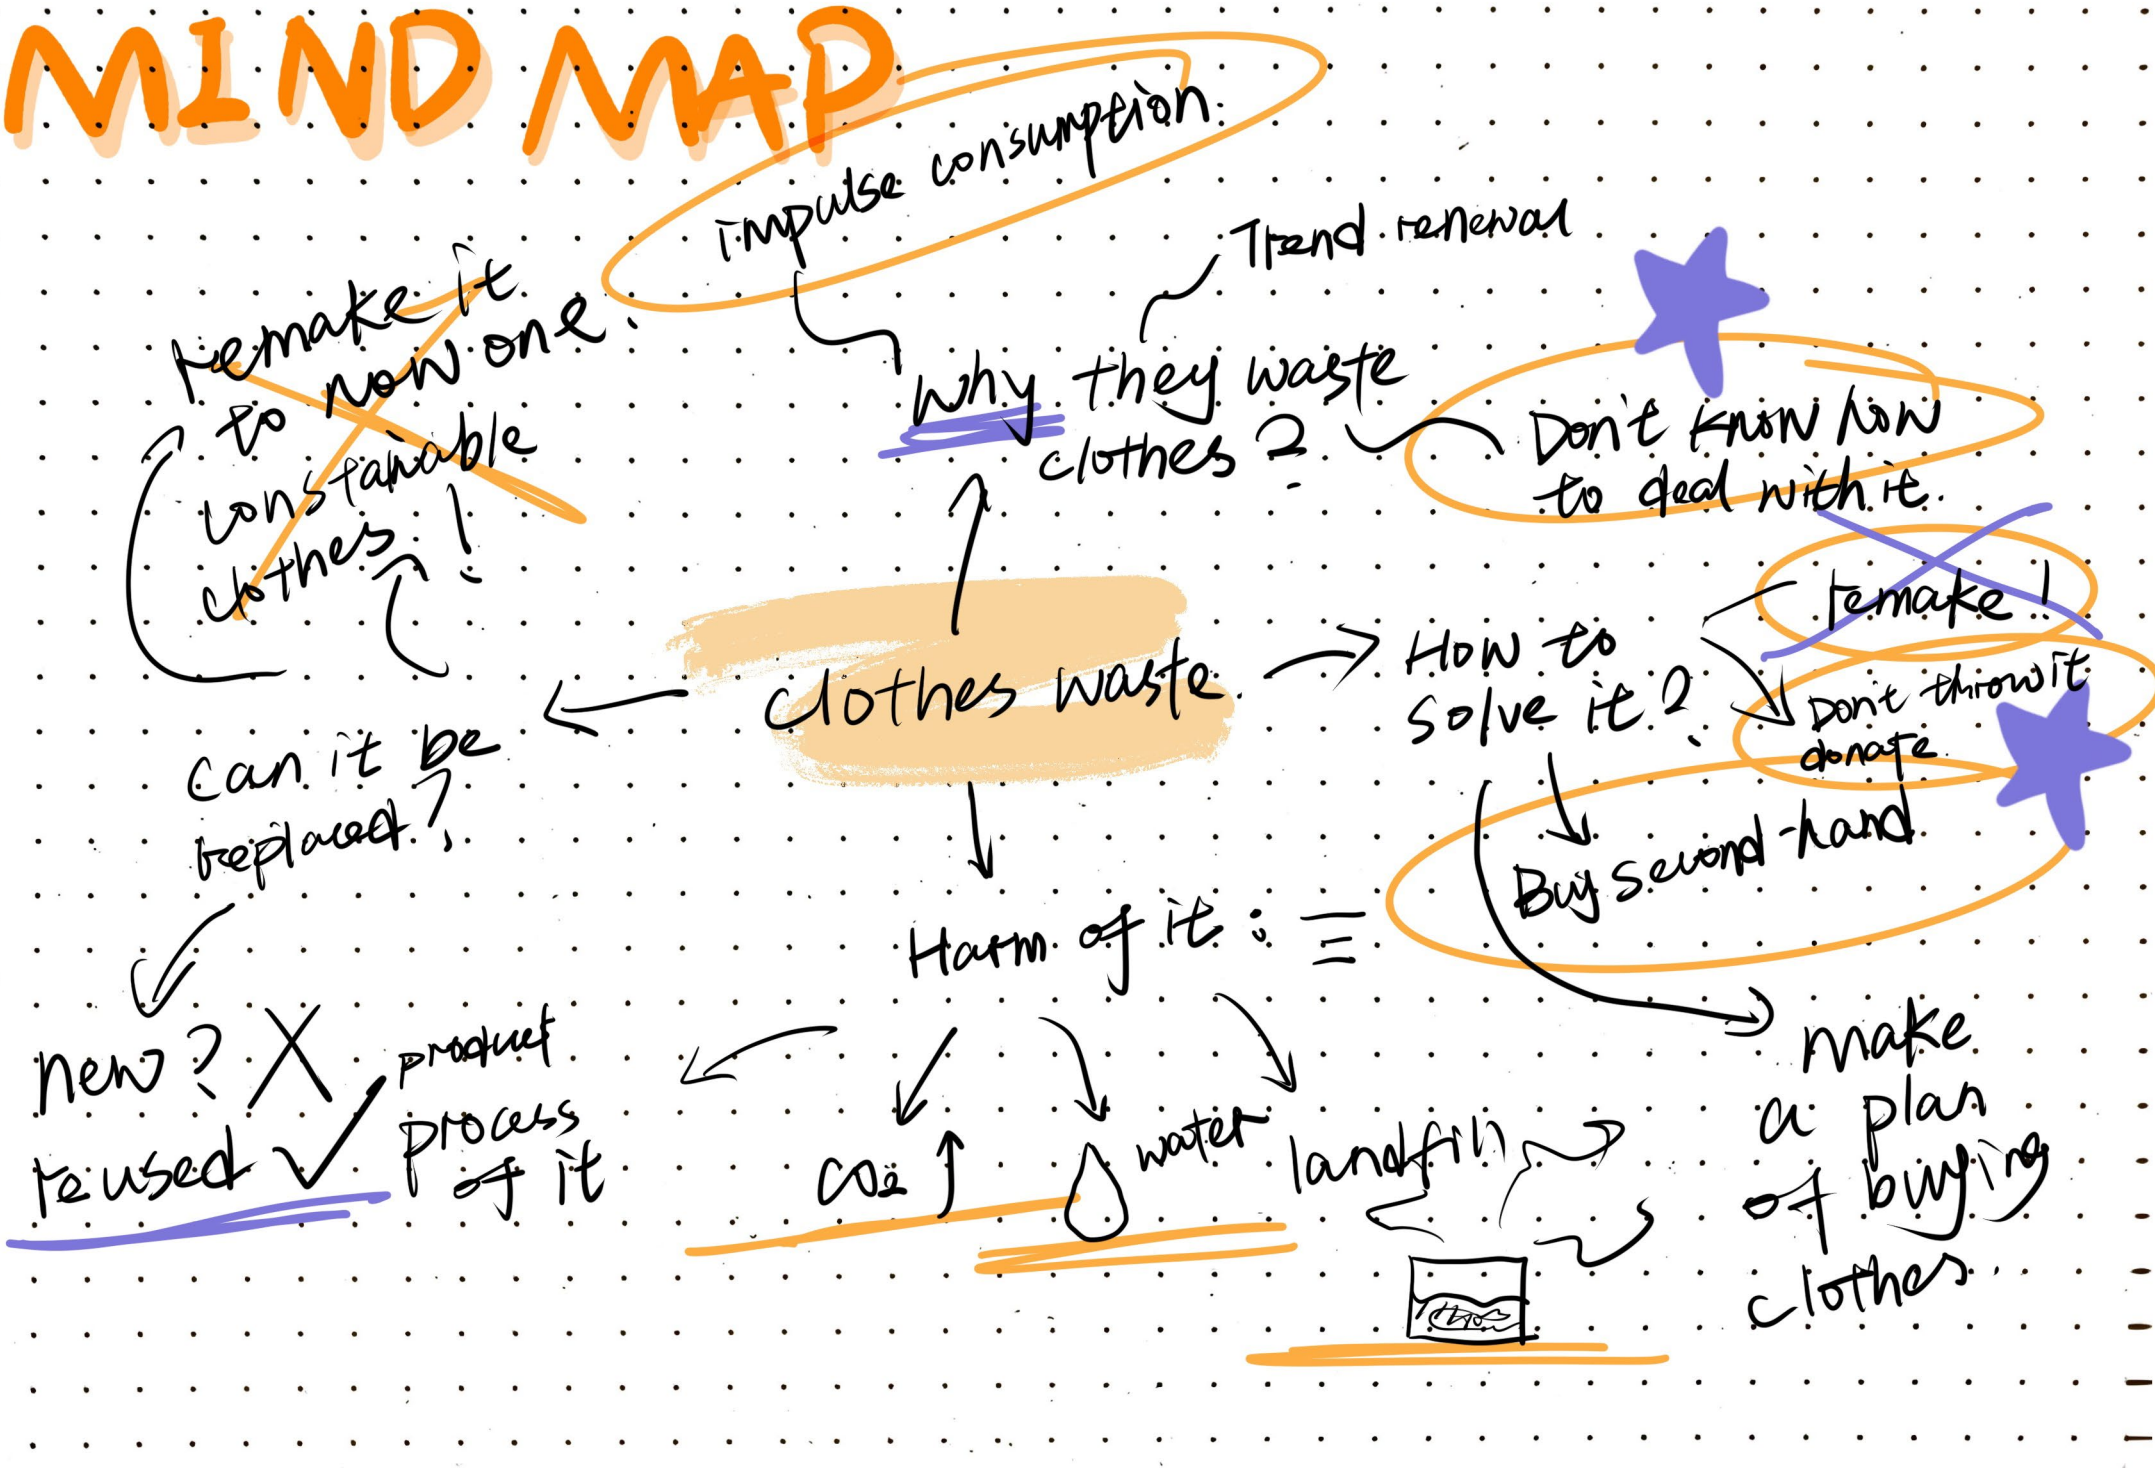
64% — of the 32B garments produced each year end up in landfill.

The fashion industry is one of the most environmentally polluting industries in the world, endangering the planet and people.

9 Things You Can Do to Reduce pollution

Carbon emissions youll eliminate by making the following changes.

MIND MAP



impulse consumption
Trend renewal
remake it to new one!
constainable clothes!
why they waste clothes?
Don't know how to deal with it.
remake!
clothes waste
How to solve it?
Don't throw it donate
Buy second-hand
can it be replaced?
Harm of it:
new? X
reused ✓
product process of it
CO2
water
landfill
make a plan of buying clothes

Questionnaire results

Do you understand the impact of wasted clothes on the environment?

- Understands in great detail
- Know some, but willing to learn more
- Don't know, but willing to understand
- Reluctant to know

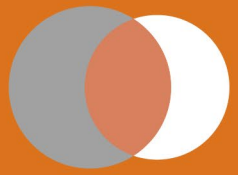
Purchase behavior

- Damaged old clothes
- Don't like the clothes I bought before
- I follow fashion trends, and favorite stores/brands
- I buy what I want to buy
- Forget that I have already purchased similar clothes

Which of the following do you think will cause pollution?

- Materials
- Production process
- Transportation
- Used clothes disposal method

Consumption method

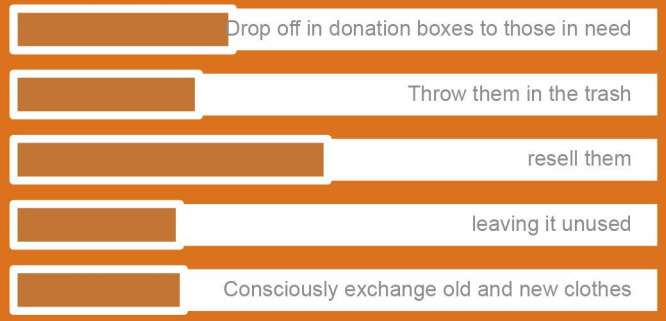


Online Offline Stores

Why you choose a fast fashion brand?

- Inexpensive, do not wear it does not hurt
- Cheap, style follows fashion trends
- Didn't know fast fashion would have an impact on the environment
- Not sure which brands are sustainable/ethical

What is your way of getting rid of old clothes?



Do you usually use second-hand shopping platforms to buy second-hand clothes?

- Yes, I buy often
- Occasionally
- Never

Questionnaire results

If you know these pollution problems you will change your consumption habits?

Yes, I would

Probably, I would try

No, I wouldn't

What sources do you usually get your environmental knowledge from.

In TV news

Mobile news push

Push from social software

Push from shopping platform

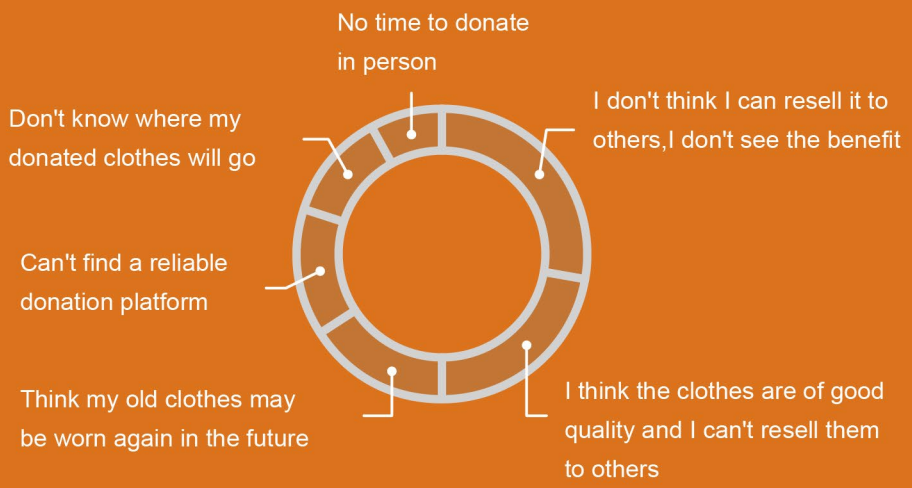
Do you know what clothing donation platforms are available in China?

I know some

I know very little

Don't know

Why not donate/secondarily sell to others?



Do you want to learn more about pollution in overbought clothes?

Yes, of course

If necessary, I would

No

Interviews

- Do you ever buy clothes impulsively?
- Do you know that this act can bring about environmental pollution problems?
- Are you willing to make a change?
- What changes have you already made?

JUN

23years old

I often often buy some new clothes very impulsively, even though I already have many of the same type. I also didn't know that this act would cause pollution.But I wish I could break the habit of buying clothes impulsively.

- Do you ever buy clothes impulsively?
- Do you know that this act can bring about environmental pollution problems?
- Are you willing to make a change?
- What changes have you already made?

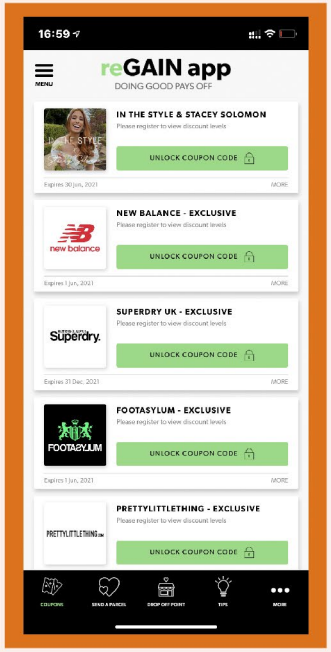
Xue

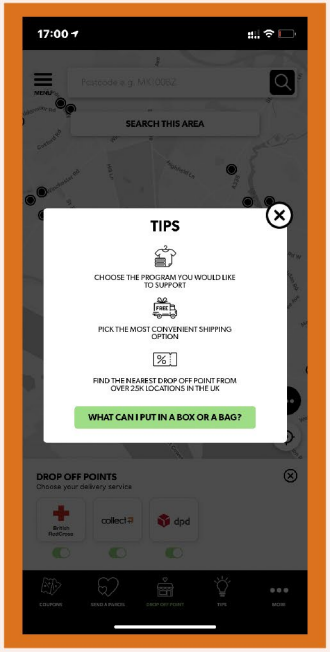
25years old

I have a lot of clothes in my closet that I don't wear anymore, and I would love to donate them, but I can't find a suitable and guaranteed platform. I would love to donate my old clothes.

Second research

As a used platform, it is very versatile. Although it also advocates people to recycle their items, there are too many consumer inducing messages on it. But it has a community feature that I think is very good.





It's an app that recycles clothes and sells them by brand categories for users. You can drop it off yourself at a drop-off point, which is environmentally friendly because, well, the delivery also causes pollution.

PACT analysis

PEOPLE

- Can’t help buying clothes
- Young people and adults
- People who want to change their consumption habits
- Hope to solve the problem of clothing waste caused by "throw away fashion

ACTIVITIES

- Recycling clothes
- Get feedback on donations/used purchases
- Daily purchase/rental/donation of used clothes

CONTEXT

- Today's clothing waste problem is serious
- Most people own smartphones
- Many clothing donation boxes are not well utilized
- A mobile app is convenient and keeps you know about the information

TECHNOLOGIES--smartphone

- Warning of clothes waste(Scan to know what kind of pollution will your clothes cause when you throw them away)
- Find someone nearby who is selling/renting used clothes
- Find nearby donation clothes(map)
- Keep track of the clothes you donate
- Reward Mechanism

Persona

About

"I know there are a lot of donation boxes for clothes nowadays and it just so happens that I have a lot of clothes in my wardrobe that I have bought and only worn a few times, so I hope to get rid of my old clothes through this. But I often can't find where the donation bins are, so I just throw my old clothes in the bin. Now I want to change this bad habit."

BUYING CLOTHES
AFTER BUYING CLOTHES
STAGE OF JOURNEY
HAVE THE IDEA OF BUYING CLOTHES
PLAN TO BUY CLOTHES
MEET WITH DIFFICULTIES MAKE CHOICE
DO EXERCISE OR NOT
PLANNING AND RESULT
DOING
Browse shopping apps
Go to physical stores
Thinking of buying clothes
Decide on new/old clothes
Buy new ones immediately
Turn to second-hand app to buy
Another new piece
Open your closet and find a lot of clothes that you have only
Thinking about what to do with the old clothes
Want to resell it
Want to donate old clothes to others
Throw it away
Can't find a suitable platform
Throw it away
Causes environmental pollution
THINKING
I am playing with my phone/shopping
I see a lot of beautiful clothes and want to buy it
It seems that second-hand ones are cheaper.Buy or not ?
Finished buying
Finished buying
My closet is too crowded!
I'm looking for ways to get rid of these clothes
Resell them
I want to help others by donating them!
I can't find the right platform
Forget it, just pile them up in the closet
But the closet is too crowded, throw it away
It causes environmental pollution
FEELING
PAIN POINT
• Because some people are unaware of the pollution caused by clothing, they do not develop good shopping habits.
• Don't know how to deal with old clothes
• Can't find a good donation platform
• Existing donation facilities are not well utilized
• The act of throwing away old clothes causes a lot of pollution

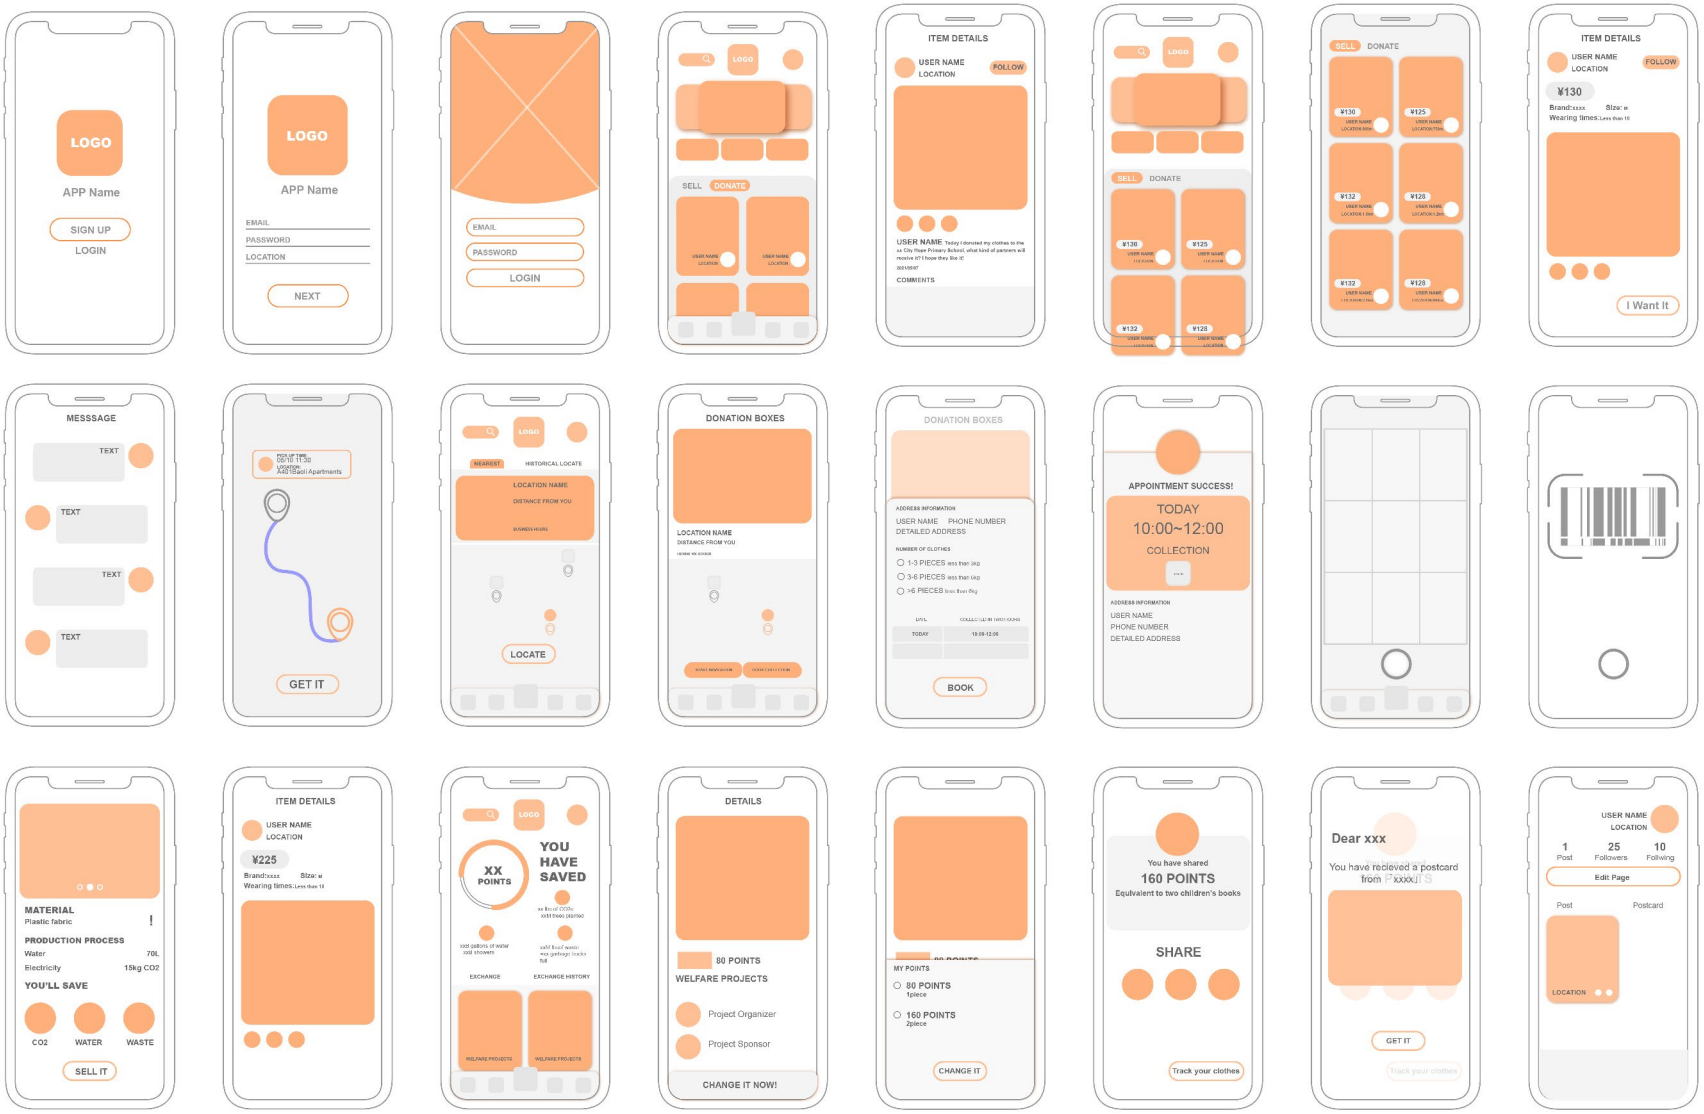
Preliminary wireframe



Preliminary test feedback

- There are so many plates on the home page that I think we can summarize a simple inter-face and break it down.
- In the scan page, the scan yields information too quickly and unattractively. Maybe a few transition pages would be better
- I'm not sure about the operation from which the points are obtained. This one function is too sudden and not clearly explained.

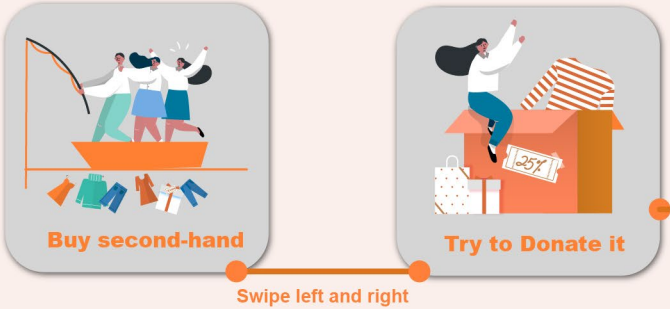
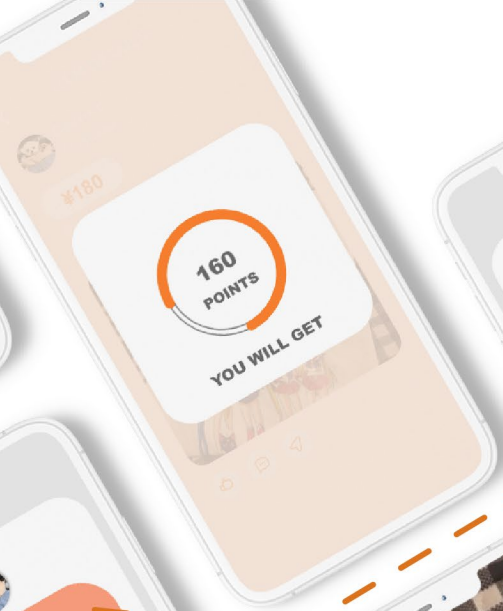
Recent environmental news pushed to the front of the community page

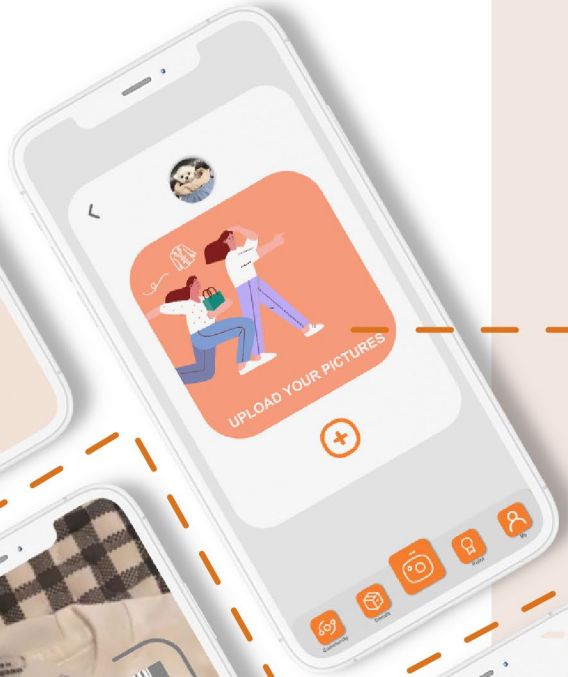


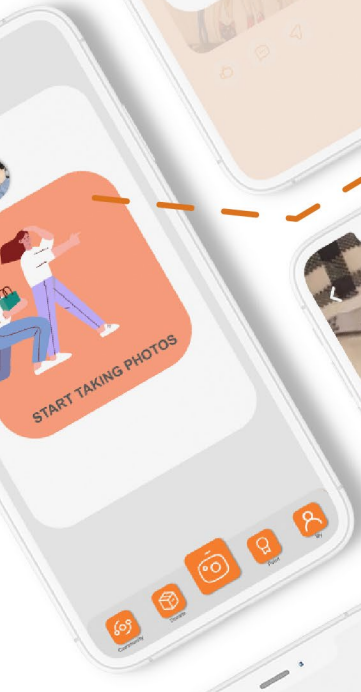
Click to switch to donate page

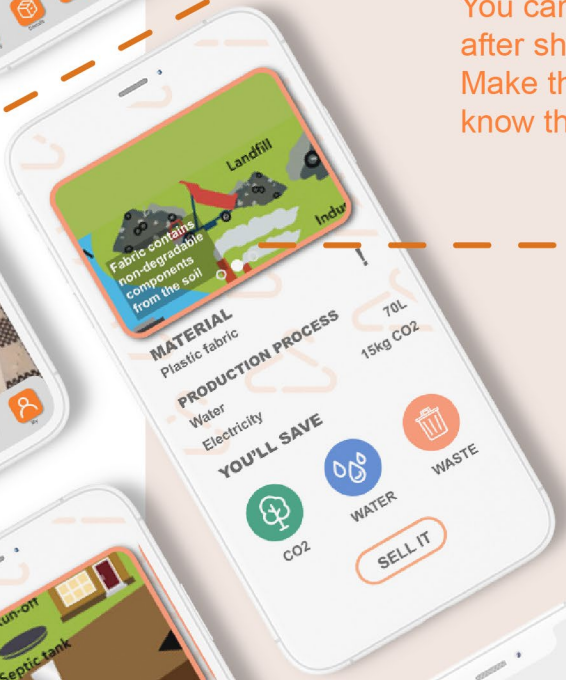
Home page of the community page, make a distinction between the donation section and the second-hand sale section

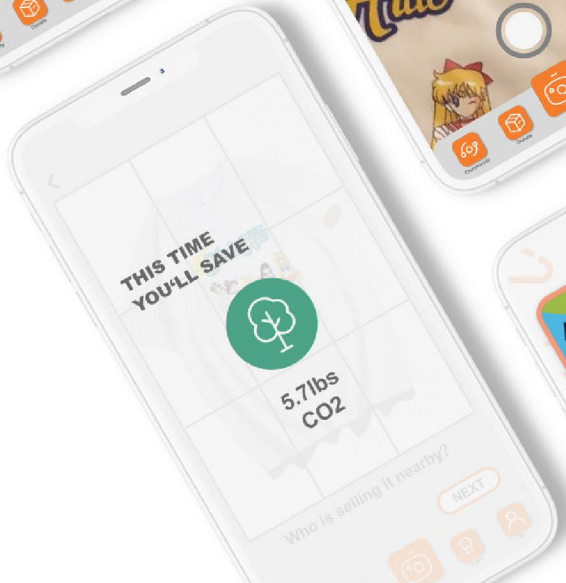
Scan page

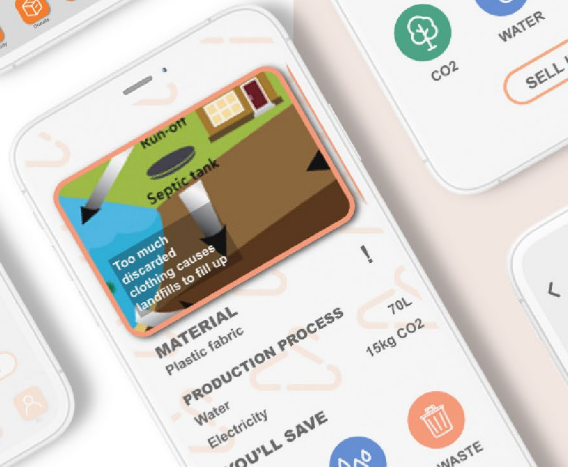


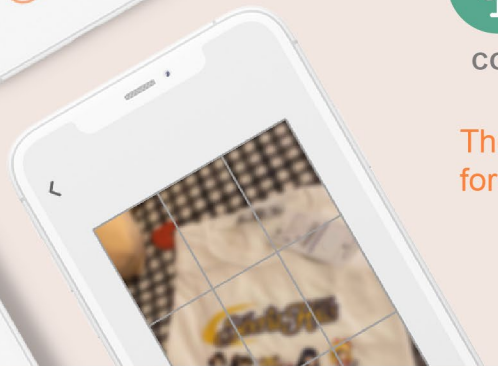


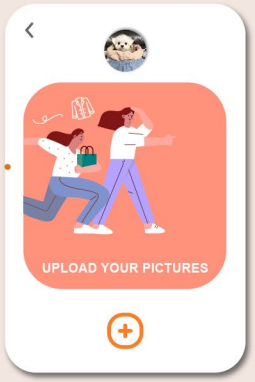


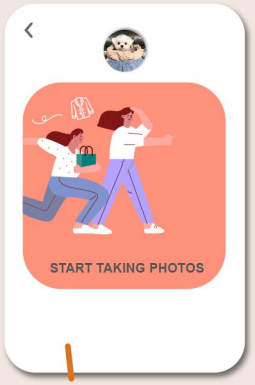




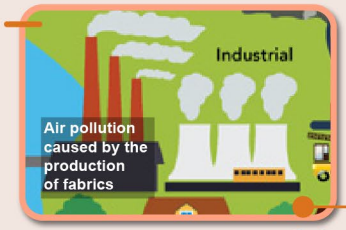


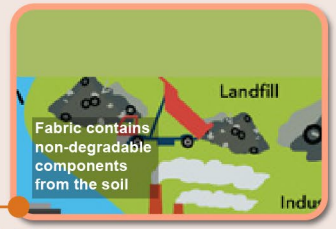






You can get the pollution index of the clothes you want to buy after shooting and scanning the barcode/uploading the photo. Make this information available to you before you buy, so you know the benefits of your recycling of clothes.





Swipe left and right

CO2

WATER

WASTE

The information will be presented in the form of a simple illustration

Donation box page

Connected to clothing donation boxes set up by the government, it automatically finds the closest clothing donation box to you and gives you the option to navigate directly to there or book a collection. This makes it easy for people who don't know where to donate their clothes to complete their own donations.
